Data Scientist/Machine Learning Engineer

Summary

Data Scientist and Machine Learning Engineer with extensive expertise in designing and deploying robust ML models and scalable data pipelines across cloud and on-premises platforms, winner of several medals and awards in **Statistics** and **Mathematics** competitions. Skilled in **Python**, **R**, and **PySpark**, with a track record of leading innovative projects in named-entity recognition, voice cloning, text summarization, and retrieval-augmented generation. Holds a Master's degree in Statistics, specializing in Data Science, complemented by published deep learning research on cognitive signal processing. Committed to leveraging data-driven solutions to advance AI capabilities and business outcomes.

EXPERIENCE

Great Learning

India, Bengaluru, Remote

Great Learning is a leading global ed-tech company offering industry-relevant programs in data science, AI, machine learning, and more, empowering professionals to upskill and advance their careers.

Mentor and course owner **December 2024-Present**

- Mentored learners in **data science** and **ML engineering**, guiding them through core concepts and applied projects.
- Courses: AI in Healthcare, Data Science and Machine Learning: Making Data-Driven Decisions.

RoomVU

Canada, Vancouver, Remote

Roomvu is the pioneer in Video Marketing for Agents, backed by the National Association of Realtors. It generates HYPER LOCAL & Relevant Videos for your social media, Ads, and Email Campaigns. They post 5x/WK across all your socials, giving you visibility and positioning you as a market leader.

Data Scientist and Machine Learning Engineer **October 2023-June 2025**

- Increased crawling pipeline accuracy by 50% by developing an NER service with **Python**, **Celery**, **gRPC**, and **Flask**.
- Led voice-cloning and image-enhancement projects, launching two products and boosting revenue by 5% using serverless GPUs and **AWS SageMaker**.
- Built a text-summarization pipeline and three automated news models, cutting manual workload by 20% and enabling faster market entry.
- Engineered scalable **RAG pipelines** achieving 98% factual accuracy and deploying a support center chatbot.
- **Deployed an AI chatbot** using **RAG** on ChatGPT, reducing agent workload by 20+ hours weekly and increasing daily customer inquiry capacity by 70%, allowing agents to handle and schedule specialized appointments autonomously.

Snappfood

Remote

Snappfood is Iran's leading online food delivery service, connecting customers with a wide variety of restaurants and grocery stores through its user-friendly platform. With a focus on efficiency and customer satisfaction, Snappfood leverages advanced technology and data-driven insights to deliver a seamless, reliable experience.

MLOps/Machine learning Engineer **July 2022 - Nov 2023**

- Accelerated ML deployments by 30% by automating training pipelines with **GitLab CI**, **Docker Swarm**, **Traefik**, and **MLflow**.
- Implemented MLOps workflows and cross-team collaboration practices, reducing bottlenecks by 30%.

Data Analyst & Big Data Scientist **Dec 2021 - March 2023**

- Joined as the fourth data scientist; built >10 ML pipelines and dashboards while mentoring two new analysts as the squad expanded to 15. Retaining 10% of churned customers, increased average app engagement time by 2x and 30% decrease in drop off rate by ML and Statistical models.
- Engineered a **Hadoop/Spark**-to-SQL Server user-action warehouse, enabling 4 teams to run A/B tests and **Power BI** dashboards. Delivered >60 Bayesian/classical experiments that lifted revenue by 5%.
- Cut Hadoop session-creation time by >60% with PySpark; deployed churn-prediction, vendor-recommendation, and auto-completion models (**MLlib**, **scikit-learn**, **MLflow**, **Evidently**, **Streamlit**). These models retained 10 % of churned users, doubled engagement time, and reduced drop-off rates by 30%.

Digikala

On site

Digikala is the largest e-commerce platform in Iran and one of the leading online marketplaces in the Middle East. Known for its vast product selection and exceptional customer service, Digikala leverages advanced technology and data-driven insights to deliver a seamless shopping experience to millions of users.

Business Data Analyst **April 2021 - Dec 2021**

- Automated vendor segmentation with interactive dashboards, saving 20% of weekly staff time
- Delivered 10 **Power BI** dashboards for sales teams to drive decision-making.
- Engineered a churn-prediction model with scikit-learn that retained more than 10,000 customers and saved about $8k per month.

Skills

- **Programming & Scripting**: Python, R, Pyspark, T-SQL.
  - Unit & Integration Testing (Pytest), OOP
- **Machine Learning & AI**: Machine Learning, Deep Learning (PyTorch, TensorFlow), Statistics, Exploratory Data Analysis, Generative AI, RAG (Retrieval-Augmented Generation).
- **Deployment & Production Engineering**: Git, GitLab CI, Docker (Swarm), Amazon SageMaker (AWS), API Development (Flask, FastAPI, gRPC), Celery.
- **Data Engineering Ecosystem**: Linux (LFCS), Airflow, Trino, Traefik, Qdrant, Power BI.

EDUCATION

TARBIAT MODARES UNIVERSITY **Tehran, Iran**
Master of Science in Statistics; Major in Data Science **2020 – 2022**

- First Rank among 10 students (GPA: 4/4)
- Thesis title: *Efficient deep learning approach to diagnosis of ADHD in children based on EEG signals.*

ALLAMEH TABATABA'I UNIVERSITY **Tehran, Iran**
Bachelor of Statistics **2016-2020**

- First Rank among 60 students (GPA: 3.93/4)

Languages

- English (TOEFL IBT: Total 5/6 (Reading 5 • Listening 5.5 • Writing 4.5 • Speaking 5)), Persian (Native)

Research publication

Journal Articles

1. **H. Jahani** and A. A. Safaei, "Efficient deep learning approach for diagnosis of attention-deficit/hyperactivity disorder in children based on EEG signals," Cognitive Computation, pp. 1–16, 2024. (Click Here)

Book and chapters

1. A. A. **Hamid Jahani**, One Chapter of Handbook of Neural Engineering, Volume 1: Signal Processing Strategies (Neural signals processing using deep learning for diagnosis of cognitive disorders). Elsevier, 2023. (Click Here)
2. **H. Jahani**, "Mathematical Statistics with R". Allameh Tabatabai University Publishing Center, 2020. (Click Here)

Miscellaneous Experience

Awards and Achievements

- First Place in Second and Third Event on Play with Real Data among 60 teams. **Feb 2023/AGNA.co**
- Second place at National Master Entrance Exam. **April 2021 / Iran**
- Silver Medal of the Statistics Olympiad. **August 2020 and July 2019 / Iran**
- Gold Medal in Iran Statistics Competition. **June 2019 / Iran**
