EXPERIENCE

Mentor and Course Owner

Dec. 2024 – Present

Great Learning

Bengaluru, India (Remote)

- Owned data science and machine learning programs (AI in Healthcare; Data-Driven Decisions) and mentored practitioners on end-to-end deep learning and NLP projects.

Data Scientist and Machine Learning Engineer

Oct. 2023 – June 2025

RoomVU

Vancouver, Canada (Remote)

- Engineered a production named entity recognition (NER) service (Python, Celery, gRPC, Flask) on cloud data pipelines, improving crawling extraction accuracy 50%.
- Built voice cloning and image enhancement products on AWS SageMaker and serverless GPUs, contributing +5% revenue.
- Deployed NLP summarization and three automated news machine learning pipelines, cutting manual editorial workload 20%.
- Shipped retrieval-augmented generation (RAG) with large language models (LLMs) at 98% factual accuracy for customer support.
- Integrated ChatGPT-based agents that saved 20+ agent hours/week, increased daily inquiry throughput 70%, and automated specialized scheduling.

Snappfood

Remote

Machine Learning Engineer

Jul 2022 – Nov 2023

Data Analyst & Big Data Scientist

Dec 2021 – Mar 2023

- Optimized machine learning operations by automating training and release data pipelines (GitLab CI, Docker Swarm, Traefik, MLflow), cutting model time-to-production about 30%.
- Standardized MLOps runbooks, reviews, and handoffs across teams, reducing cross-team delivery friction about 30%.
- Fourth data scientist hire: built 10+ machine learning pipelines and dashboards, mentored two analysts as the team scaled from 4 to 15; recovered 10% of churned users, doubled engagement, cut drop-off 30%.
- Grew revenue 5% with a Hadoop/Spark data warehouse powering 60+ experiments, A/B tests, and Power BI for four teams.
- Reduced Hadoop session startup time by more than 60% using PySpark on large-scale batch data pipelines.
- Owned production churn, vendor recommendation, and query autocomplete models (MLlib, scikit-learn, MLflow, Evidently, Streamlit).

Business Data Analyst

Apr. 2021 – Dec. 2021

Digikala

Tehran, Iran

- Cut weekly analyst and sales prep time 20% by automating vendor segmentation and delivering 10 Power BI dashboards on operational data pipelines.
- Deployed a scikit-learn machine learning churn model retaining 10,000+ customers, contributing about \$8,000/month in measurable savings.

EDUCATION

Tarbiat Modares University

Tehran, Iran

M.S. Statistics (Data Science), GPA 4.0/4.0, 1st/10; thesis: EEG deep learning for childhood ADHD

2020 – 2022

Allameh Tabataba'i University

Tehran, Iran

B.S. Statistics, GPA 3.93/4.0, 1st/60

2016 – 2020

Languages

English (TOEFL iBT: 5 / 6 (Reading 5, Listening 5.5, Writing 4.5, Speaking 5)); Persian (Native)

PROJECTS

Industrial IoT Predictive-Maintenance Platform (SensesIQ)

Python, Kafka, MongoDB, SQL Server, Grafana, Docker, Linux, MLflow, Gitlab CI/CD

2025 – Present

- Architected an end-to-end real-time platform ingesting data from 40+ industrial spinning mill machines into a fault-tolerant streaming pipeline with reliable delivery and automated source-outage recovery.
- Built real-time monitoring dashboards used by operations and maintenance teams to triage machine health and downtime, decreasing time to outage response by 30%.
- Applied unsupervised signal processing with a temporal convolutional autoencoder to detect anomalous machine behavior in real time, preventing 100+ critical failures.
- Shipped live machine-failure alarming to operators via Telegram in under 5 seconds, cutting mean fault-response time and downtime.

SKILLS

Programming & Scripting: Python, R, PySpark, T-SQL; unit and integration testing (pytest); OOP

Machine Learning & AI: Machine Learning, Deep Learning (PyTorch, TensorFlow), Statistics, Exploratory Data Analysis, Generative AI, RAG (Retrieval-Augmented Generation)

Deployment & Production Engineering: Git, GitLab CI, Docker (Swarm), Amazon SageMaker (AWS), API Development (Flask, FastAPI, gRPC), Celery

Data Engineering Ecosystem: Linux (LFCS), Airflow, Trino, Traefik, Qdrant, Power BI

PUBLICATIONS

- **Hamid Jahani**, A. A. Safaei, “EEG-based deep learning for childhood ADHD diagnosis,” *Cognitive Computation*, 2024.
- A. A. Safaei, **Hamid Jahani**, ch. in *Handbook of Neural Engineering*, Vol. 1, Elsevier, 2023.
- **Hamid Jahani**, *Mathematical Statistics with R*, Allameh Tabataba’i University Press, 2020.

AWARDS

- First place, Play with Real Data (60 teams), AGNA.co, Feb. 2023
- Second place, National Master’s Entrance Exam, Iran, Apr. 2021
- Silver medal, National Statistics Olympiad (Aug. 2020; Jul. 2019); Gold medal, Iran Statistics Competition (Jun. 2019)
